

Step 1:

- Push gently on opposite corners of flat box to square, the bottom flaps will automatically form.
- Reach inside and push down interior/bottom flap to locking position.
- The box is ready for CHILLr insulation pads.

Step 2:

- Insert larger CHILLr insulation pad along the bottom and back wall of the box.
- Insert the smaller CHILLr insulation pad to form a U-shape and insert into box.

The assembly is ready for (frozen) Enviro-Ice gel packs and your temperature sensitive products to be packaged and shipped.

Step 3:

- Fold down CHILLr insulation pad to cover the top of contents.
- Close smaller flaps first then the larger flap without the adhesive strip.
- Remove adhesive strip from final carton flap, and close, applying pressure to ensure a bond with box material.
